NextGenLogistics ERP

One connected platform for freight forwarding, warehouse & financial operations

Customer · Shipment · Warehouse · Finance | JohnTuringWatson Software Solutions

About JohnTuringWatson Software Solutions

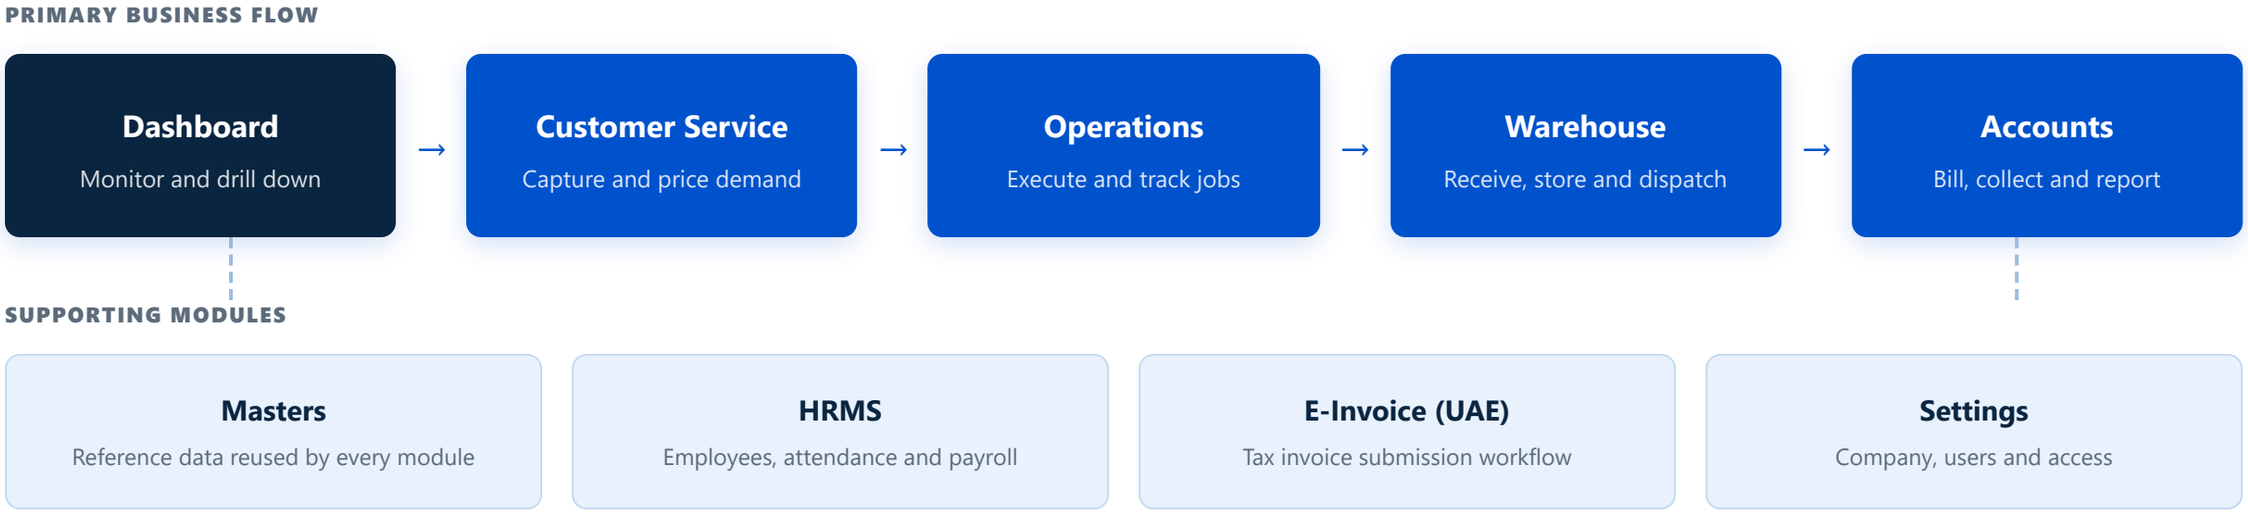

- JohnTuringWatson Software Solutions is a software company that designs and delivers dependable, scalable **enterprise technology** for organizations across industries and geographies.
- Our expertise spans enterprise applications, data and analytics, **legacy modernization**, and mission-critical platforms, helping organizations simplify complex technology environments.
- Innovation and **applied AI** are central to our approach, enabling practical automation, intelligent workflows, decision support, and modern business solutions.
- With a diverse talent pool and **global presence**, we partner with clients to modernize systems, simplify complexity, and adopt scalable technology through flexible engagement.
- We are recognized for **IBM i (AS/400) modernization**, integrating legacy platforms with cloud, data science, and AI to keep mission-critical systems dependable as they evolve.
- Our services include **ERP integration**, security architecture, automation, and application enhancements — delivered from India, the United Kingdom, and the United Arab Emirates.

About JohnTuring: NextGenLogistics

- **JohnTuringWatson Software Solutions** designs and delivers dependable, scalable enterprise technology — including logistics ERP — with applied AI and integration expertise across India, the United Kingdom and the United Arab Emirates.
- **NextGenLogistics ERP** is an integrated, web-based platform that connects customer service, freight operations, warehouse activity and finance on one operational record — from enquiry and quotation through execution, billing and ledger.
- Built for **freight forwarders and logistics operators** who need enquiry-to-cash control across branches, transport modes and handling locations — without disconnected spreadsheets or duplicate data entry.
- Covers customer service, **sea, air and land** operations (master and house jobs, tracking, costing), **warehouse** inbound through dispatch, **accounts** (invoicing, receipts, reconciliation, reporting), plus dashboards, masters, **HRMS**, e-invoice (UAE) and settings.
- Shipment details, documents, charges and warehouse handling stay on the same **job thread**; **multi-branch** and **multi-currency** where configured; a **WhatsApp enquiry bot** feeds the ERP; and an **in-app AI assistant** guides users with role-based access.

NextGenLogistics Modules

Five modules carry the work from first view to final ledger; four more provide what that flow depends on.

NextGenLogistics ERP — Salient Features

OPERATIONS & FREIGHT

- Customer, enquiry & quotation lifecycle
- Contracts & tariff-aware pricing
- Quote-to-shipment; sea, air & land operations
- Sea/air consolidation (MBL/HBL, MAWB/HAWB)
- Master & house jobs; tracking & milestones
- Shipment documents & operational exceptions
- Dispatch Center, multimodal & customs
- Route network & planning

WAREHOUSE & FINANCE

- Inbound receiving & inventory by location
- Consolidation pool (customer · destination · mode)
- Multi-supplier lines in one pool group
- Load lists, partial dispatch & AWB/container refs
- Return-to-inventory from pool or draft lists
- Warehouse dispatch linked to freight jobs
- Invoicing, ledger & job-level P&L; multi-currency
- Bank feeds & payment reconciliation (import-assisted)

ENTERPRISE, AI & DIGITAL

- Multi-branch letterhead & centralized masters
- HRMS; role-based access across modules
- Approval inboxes (warehouse & commercial)
- UAE e-invoice workflow (ASP setup for go-live)
- AI ERP assistant — guided Q&A & system navigation (when configured)
- Document extraction from text/PDF — human review before save
- Demand forecasting & planning insights
- WhatsApp & email delivery of quote/invoice PDFs (configured channels)
- Dashboards, KPIs & management analytics

PLATFORM-WIDE CAPABILITIES

Multi-branch • Multi-currency • Role-based access • Workflow & approvals • Management dashboards

NextGenLogistics ERP

Integrated Freight Forwarding, Warehouse & Enterprise Management Platform

Enquiry to cash, with the warehouse inside the same system.

Disclaimer. This presentation describes the general capabilities and direction of NextGenLogistics ERP. It is provided for information only, is not a commitment to deliver any particular feature, and should not be relied upon in making a purchasing decision. Available functionality varies with the subscribed plan, enabled modules and tenant configuration. Demonstration, configuration-gated, partial or unconfirmed capabilities should be confirmed in scoping before contract.
